

Water main work to begin in Wickliffe

Starting next week, a contractor will begin work to install a new 12-inch water main along Worden Road in Wickliffe and a new concrete pavement to replace all of the concrete drive aprons and sidewalks, according to the city.

Motorists will be provided a temporary ramp to compensate for any elevation difference between the pavement base and driveways and street castings (manhole covers, catch basins) will be exposed until the contractor can adjust them to grade, the city said.

Normal work hours will be between 7:30 a.m. and 7:30 p.m. Mondays through Fridays and construction is anticipated to be complete in November with final restoration at the end of May 2012.

Residents on the street have been sent a letter with more details.

The city asks motorists to take extra caution and care when traveling the street during the construction period.
